

HOW TO MAKE AN INPATIENT REFERRAL TO SHEPHERD CENTER

At Shepherd Center, our team approach starts the moment you call. Our staff of access case managers can assess patients anywhere in the United States within 24 hours of referral. We offer this service free of charge and often serve as the referring hospital's primary educator and resource for family members.

We will help you through this with an action plan that identifies important next steps for your family to take.

CONTACT OUR ADMISSIONS DEPARTMENT

Please contact our Admissions Department to refer a patient with a catastrophic spinal cord injury, acquired brain injury or neuromuscular diagnosis.

By Phone or Fax:

1-800-SHEPHERD (800-743-7437) or 404-350-7345 (within metro Atlanta area), or fax 404-603-4504. (8 a.m. - 4:30 p.m. Monday-Friday).

By Email:

Email admissions at admissions@shepherd.org

Online:

Make a referral for a newly or recently injured person at shepherd.org/admissions.

You will be asked for basic information. Please be prepared to answer questions regarding:

- Patient's current location
- Potential date of transfer
- The individual's date of injury or onset of illness
- The level of injury or type of illness
- Other medical history
- Individual's assigned case manager/discharge planner
- Insurance provider, policy number and customer service number
- If no medical coverage is available, you will be able to speak with a financial counselor.

ADMISSIONS PROCESS

The admissions process includes the assessment of the medical, clinical and psychosocial needs of each patient and family to ensure the most appropriate level of care. The initial assessment process may be completed by phone or on-site visit by a Shepherd Center clinical evaluator.

WORKERS' COMPENSATION

Patients who are seeking admission to Shepherd Center under workers compensation and need assistance or information may contact Julie Leighton at 781-354-5632 or julie_leighton@shepherd.org.
